Welcome to the CSS Reporter Annual Report edition 2009/10

The CSS Reporter is your quick guide to how the CSS performed in 2009/10. In these pages you'll find the important facts and figures, as well as news and updates from the year that's been.

Breaking news

Super reading – your annual report goes interactive

Keeping up with how your super fund is performing just got easier with the new online CSS Annual Report – the CSS Reporter. Instead of sifting through page after page of reports, the new interactive format lets you jump right to the information you're interested in. Along with all the financial facts and figures, the CSS Reporter also features interesting news items and stories from the year that's been and much more. So to see how the CSS has been working for you over the past financial year, visit www.css.gov.au/css_reporter.

Intergenerational Report 2010 focuses on super

On 1 February the Australian Government released the **Intergenerational Report 2010** which sets out the social, economic and policy challenges Australia will face between now and 2050 as a result of our ageing population. This report canvassed a broad range of issues including population growth, employment and environmental sustainability, and particularly highlighted the importance of super in supporting older people once they leave the workforce.

The report suggested that as older people come to make up a higher proportion of Australia's population in the years ahead, it will become more and more difficult for governments to provide for their needs through benefits such as the aged pension. As a result, private super savings are likely to become more important than ever before, and the choices each of us make about our super today will have a big impact on how we live in the years to 2050. To find out more about the **Intergenerational Report 2010** and the importance of superannuation in an ageing Australia visit www.treasury.gov.au/igr.

Henry review: government proposes increased super contributions

After more than a year of anticipation, the Henry taxation review was handed to the Australian Government in December 2009. Treasury Secretary Ken Henry's review was the first in-depth examination of Australia's tax system for over a decade, and the final report contained a wide-ranging series of recommendations for reform.

In response to the Henry review, the government proposed a number of important changes to Australia's superannuation system. Most significantly, the government is proposing to increase the current super guarantee rate from 9% to 12% over seven years from 2013 to 2020, significantly boosting employer contributions.

Other key proposals include:

- > increasing the super guarantee age limit from 70 to 75
- > offering a government super contribution of up to \$500 a year for those on an adjusted taxable income of up to \$37,000
- > maintaining the concessional contributions cap at \$50,000 (indexed) for those aged 50 or over who have less than \$500,000 in super after 30 June 2012.

These proposed superannuation changes haven't been introduced to Parliament and may not become law, but we will keep you up-to-date with the latest news and what the changes may mean for your super at www.css.gov.au.

Get your full Annual Member Statement online

To make it easier to see how your super has performed in 2009/10, you can now access your full **Annual Member Statement** via the secure **Member services online** section at www.css.gov.au. As well as being able to download and print your statement, you can also access the interactive **Member Statement Guide** which explains each section in detail to make sure you understand how your super is working for you.

Unless you have requested otherwise, we will still send you a printed copy of your **Annual Member Statement**. If you'd like to cut down on paperwork by accessing this exclusively online, make sure you update your email address in **Member services online** at www.css.gov.au.

You'll need an access number to use this service. If you don't have one or you've misplaced it, call us on 1300 000 277 and we can give you one over the phone.

Proposed ARIA and Military Super merger update

The Bills covering the proposed merger and other governance and administration reforms were not debated in the Senate prior to the election being called. This means the proposed merger of ARIA, the Military Superannuation Board and the Defence Force Retirement and Death Benefits Authority did not proceed on 1 July 2010.

We will keep you updated on any relevant developments through the news section of the website.

CSS Product Disclosure Statement update

In November 2009 we published a **Supplementary Product Disclosure Statement** which highlights some changes to the current **CSS Product Disclosure Statement**. Importantly, the supplementary statement outlines changes to the **Fees and other costs** section. In 2009 we also released two online updates to the **Product Disclosure Statement** which addressed the Australian Government super co-contribution scheme and the tax treatment of lump sums, so visit www.css.gov.au for the most up-to-date information.

This is important

The information in this Annual Report is general information only and has been prepared without taking into account your personal objectives, financial situation or needs. You should consider any advice in this document in light of your personal objectives, financial situation and needs before acting on it. You may wish to contact a licensed financial planner to do this. If you are

looking at acquiring a financial product, you should obtain a Product Disclosure Statement and consider its contents before making any decisions. This document was prepared on 27 August 2010 by ARIA ABN: 48 882 817 243 AFSL: 238069 RSE Licence No: L0001397, Trustee of the CSS ABN: 19 415 776 361 CSS RSE: R1004649.

This Annual Report contains addresses of websites that are not published or maintained by, or on behalf of, ARIA. Information on those websites does not form part of your Annual Report, and ARIA is not responsible for, nor does it endorse, that information. ARIA is not liable for any loss, damage or liability arising in connection with your use of, or access to, any of those websites.

We are required to provide you with any additional information you may reasonably need to understand your benefit entitlements, including death and invalidity benefits. Details of other investment options and contribution levels that may be available to you are also available on request from ARIA. To access or request this information, please contact us using the details set out in the **Contact us** section of this Annual Report.

Super in focus

Inside the CSS: members benefit from super mix

Unlike most Australian super schemes, your super is part defined benefit and part accumulation. For contributing members (if you leave as an age-retiree), your CPI-indexed pension isn't affected by the fund's investment performance.

For CSS members your benefit is made up of:

Your membership component	This is made up of your basic contributions (5% or 0% of your salary) and your supplementary contributions (any contributions above your basic contributions), and includes any fund earnings (positive or negative).
Your productivity component	This is made up of your fortnightly employer contributions as well as any fund earnings (positive or negative).
Employer-financed component	This is a defined amount financed by your employer, which you receive as an indexed pension when you leave the workforce.
Additional amounts	Any additional amounts you've transferred in from other super funds and any government super co-contributions.

Why your contributions are important

If you're a CSS contributing member one of the most important choices you need to make is the rate at which you're going to contribute. For many people, this mostly affects the accumulation part of their super, but for some members it will also affect the pension benefit they're entitled to. Before you decide to stop contributing you should seek professional advice from an experienced financial adviser.

To find out more read the **Contributions** fact sheet at www.css.gov.au.

How the CSS benefits you

As a member of the CSS, you get:

- > a high value employer benefit well above the superannuation guarantee
- > no administration fees – your employer covers these costs
- > the option of changing your contribution rate at any time to suit your financial needs
- > automatic death and invalidity cover at no extra cost
- > a choice between two different investment options – the Default Fund or the Cash Investment Option
- > a range of flexible retirement options, including a CPI-indexed pension for life.

Eligible rollover fund

If your super becomes payable as a lump sum and we don't receive instructions on how you'd like your claim paid within 90 days of you stopping work, it can be paid into an eligible rollover fund. ARIA's nominated fund is:

AUSfund
PO Box 2468
Kent Town SA 5071
Phone: 1300 361 798

If your benefit has been transferred, you must claim it from the rollover fund and you'll be subject to its terms and conditions.

Superannuation surcharge tax

The Australian Government abolished the superannuation surcharge from 1 July 2005 but you may still have to pay it in certain circumstances. For example, if your adjusted taxable income for any years when the surcharge applied, was higher than the annual thresholds, you may have some outstanding tax to pay. Also, if you didn't provide your tax file number to the CSS, you may have a surcharge debt in relation to certain employer contributions reported to the ATO up to and including the 2004/05 financial year.

The ATO determines whether you've incurred a surcharge debt and if you have, the amount will be shown in the surcharge debt table on your **Member Statement**. If you have a surcharge debt, you don't have to pay it now – it will be deducted from your CSS benefit when it's paid to you. If you want to, you can reduce your surcharge debt by making early payments.

Interest calculated at the 10-year Treasury Bond Rate will be applied to any outstanding balance of your surcharge debt account as on 30 June each year. If the surcharge amount shown in your **Member Statement** varies from the amount you were advised by the ATO, please contact them on 13 10 20.

When thinking about your life in retirement, remember that according to the Australian Institute of Health and Welfare, the average life expectancy for Australian men is now 79 years, and 84 years for women. That means if you retire at 55 your super might need to last you more than 25 years.

Future needs guide super choices

What kind of lifestyle do you want to enjoy in your life after work, and what will it take to get there? We all want to feel financially secure, but this can mean different things to different people depending on their goals and expectations. The key to reaching your personal goals is to be prepared, and the sooner you start planning for the future, the better off you're likely to be.

How much money do you think you'll need?

Most of us have thought about when we'd like to stop working, but we haven't thought as hard about how much money we're going to need to enjoy life after work. The answer won't be the same for everyone, but research into retirement living standards by ASFA and Westpac might help get you thinking about how much you'll need. Visit www.superannuation.asn.au for more information.

Here are some useful questions that you should also ask yourself:

- > When do I want to retire?
- > If I retire then, how long will my savings need to last?
- > Will I still have debts to cover?
- > What sort of lifestyle do I want and how much will this cost?
- > Where do I want to live once I leave the workforce?

Once you've answered these questions, you can try doing a budget to see how much the lifestyle you want will cost. The template at www.understandingmoney.gov.au is a great place to start.

How much money are you likely to have?

Working out how much money you're likely to have for your retirement is just as important as thinking about how much you'll need.

The CSS i-Estimator in Member services online at www.css.gov.au can help you estimate your final benefit. You should also consider any other income which might supplement your superannuation, such as that from investments and property.

How can you supplement your savings?

If there's a big difference between the lifestyle you want and the one you think you'll be able to afford, don't panic. There are plenty of things you can do to help bridge the gap between now and when you retire.

You might consider:

- > increasing your rate of contribution – visit the **Contributions** section of our website to find out more
- > claiming your super in a different way – www.fido.gov.au has some useful information on this
- > examining the tax and social security implications of different super choices – Centrelink's planning for retirement service at www.centrelink.gov.au has useful information on payments, services and programs relating to life after work.

Under 45 year olds plan for the future

When you're juggling work, family and paying off the mortgage, superannuation is usually the last thing on your mind. But taking a little time to plan for your retirement today will ensure you're in a good position to relax and enjoy a worry-free life when you leave the workforce.

Future needs guide super choices

Knowing what kind of lifestyle you want to enjoy in the future is the first step in planning for this. It's never too early to start, so see **Future needs guide super choices** article above for some things that you can do today.

Online estimator helps CSS members plan

To see if you're on track to achieve the lifestyle you want when you finish working, use the online CSS i-Estimator in Member services online at www.css.gov.au to check your estimated benefit.

Small contributions add up to big savings

With your retirement still a few years away, putting a little bit extra aside now can make a world of difference when you're ready to stop working. In the CSS, you can choose to contribute 0%, 5% or more of your after-tax salary. Even contributing small amounts will make a difference to your final savings.

Government offers super co-contribution to boost retirement savings

If your total income is less than \$61,920*, and you choose to contribute to your super, you may qualify for the government's super co-contribution. If you do, the government will contribute up to one dollar for every dollar of after-tax income you put towards your super, up to a maximum of \$1,000. Our **Super co-contributions** fact sheet has more information on how to qualify and how much you can get, so call us on 1300 000 277 or visit www.css.gov.au for this and other useful documents.

*Subject to eligibility requirements and caps which are explained in the fact sheet.

For more information on your CSS contribution options, have a look at our **Contributing to the CSS** fact sheet. If you would like to change your contribution rate, just complete the **Election to vary contribution rate** form available on our website.

CSS gives members investment choice

If you haven't made an investment choice, your super will currently be invested in the Default Fund. You can choose to move your super out of the Default Fund and place it in the Cash Investment Option. For many people, the length of time they have before they plan to withdraw their super affects the way they choose to invest it, so to find out more about switching investment strategies see **Investments** section starting on page 5.

Super strategies for the future

You can get more information about the CSS and the right super strategies for this stage of your life by visiting the **Lifestages** page online at www.css.gov.au.

'I always assumed I'd have enough money for the retirement I want because I've been a member of the CSS for years now. But when I used the i-Estimator I discovered I'd need to get serious about super if I wanted to retire in my 50s. By regularly monitoring my progress I can make sure I'm on the right track and plan to make extra contributions if I need to.' – Patrick, 38

Retirement plans on the agenda for 45 to 54 year olds

With retirement getting closer, you're probably starting to think more carefully about life after the workforce. Now is the time to make the smart choices that will help make your retirement years the best of your life.

45 to 54 years

Online estimator helps CSS members plan

As you get closer to retirement, you'll be able to get a clearer picture of what your final benefit is likely to be. The online CSS i-Estimator in Member services online at www.css.gov.au will let you see if you're on track to achieve your lifestyle targets, or if there's still more that you need to do.

CSS members look to the finish line

Deciding when you'd like to finish work and what you're going to need for your retirement will help you plan your super choices between now and then. To make sure you're on the right track, have another look at [Future needs guide super choices](#) article on page 3 and ask yourself the important questions.

Government offers super co-contribution to boost retirement savings

If your income is less than \$61,920*, and you choose to contribute to your super, you may qualify for the government's super co-contribution. If you do, the government will contribute up to one dollar for every dollar of after-tax income you put towards your super, up to a maximum of \$1,000. Our [Super co-contributions](#) fact sheet has more information on how to qualify for and how much you can get, so call us on 1300 000 277 or visit www.css.gov.au for this and other useful documents.

For more information on your CSS contribution options, have a look at our [Contributing to the CSS](#) fact sheet. If you would like to change your contribution rate, just complete the [Election to vary contribution rate](#) form available on our website.

*Subject to eligibility requirements and caps which are explained in the fact sheet.

CSS gives members investment choice

If you haven't made an investment choice, your super will be invested in the Default Fund. You can choose to move your super out of the Default Fund and place it in the Cash Investment Option. For many people,

the length of time they have before they plan to withdraw their super affects the way they choose to invest it, so to find out more about [Changing investment strategies](#) see page 5.

Super strategies target upcoming retirement

You can get more information about the CSS and the right super strategies for this stage of your life by visiting the [Lifestages](#) page online at www.css.gov.au.

'With the kids finishing school and moving out of home we found we had a bit more money to spare, so we decided to increase our supplementary contributions. We don't really notice the difference now but we know that putting that extra money aside will give us more peace of mind when we decide to stop working in the next few years.' – Graham and Laura, 50

55+ members step into a new life

As you near the end of your time in the workforce, it's exciting to look forward to the new life that's ahead of you. But now is also the time to adapt your strategy if necessary to ensure smooth sailing for your retirement years.

55+ years

Retiring CSS members take stock

Knowing when you'd like to finish work and what you're going to need for your retirement will help you plan your super choices between now and then. To make sure you're on the right track,

have another look at [Future needs guide super choices](#) article on page 3 and see if anything has changed since you last asked these important questions.

Online estimator helps CSS members plan

To check if you're on track to achieve the lifestyle you want when you finish work, use the online CSS i-Estimator in Member services online at www.css.gov.au to check your potential benefit. This tool will help you see what all your hard work has achieved.

Government offers super co-contribution to boost retirement savings

If your income is less than \$61,920*, and you choose to contribute to your super, you may qualify for the government's super co-contribution. If you do, the government will contribute up to one dollar for every dollar of after-tax income you put towards your super, up to a maximum of \$1,000. 'I knew exactly when I wanted to retire, so in the last few years I really worked to secure my final benefit by making sure I had the right investment strategy and increasing my contribution rate to the maximum level. That last little burst cemented all my hard work over the years so that I was in a good position to retire when I was ready.' – Deb, 58

Investments

CSS investment strategy

The CSS investment strategy is based on four key principles:

1. Taking a global view

Investing only in Australia can limit potential returns, so ARIA also searches for investment opportunities in both established and emerging international markets.

2. Long-term versus short-term

We focus on acquiring assets that can sustainably deliver returns to members over the long term. We seek to exploit shorter-term pricing opportunities to enter or exit our investment strategies, and we are aware of the desirability of reducing short-term volatility, where possible.

3. Diversification

Where fund investment constraints permit, we invest your super across different asset classes to reduce concentration of risk in any one theme.

4. Best-practice due diligence and manager selection

We focus on identifying asset managers with the skills to understand asset market fundamentals, price risk appropriately and generate consistent risk-adjusted returns.

2009/10 investment performance summary

Over the financial year to 30 June 2010, the CSS Default Fund rose by 9.3%. The major contributors to the positive return were a rise in equities of around 13.1% in Australian share markets and 11.5% in global share markets.

Dampening this overall result was a sharp decline in global share markets during the June quarter. This fall of around 11.2% was triggered in part by fears of sovereign solvency in peripheral Euro member nations such as Greece as well as uncertainty regarding policy actions. Diversification into corporate credit, government bonds, property and actively diversified global managers helped offset this negative impact to some extent.

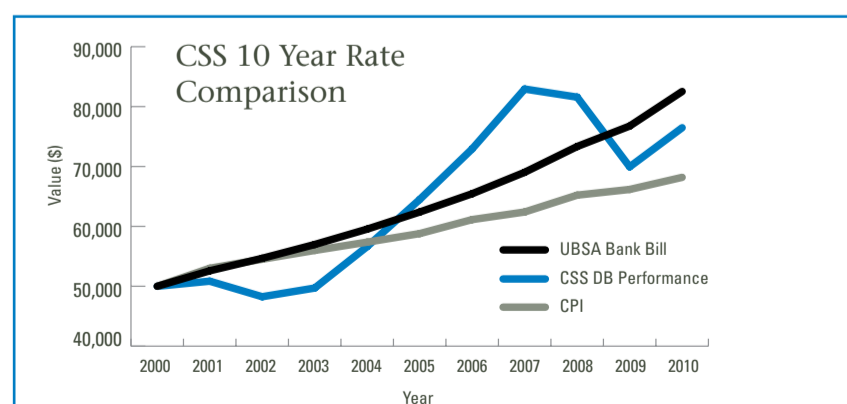

Over the past year, we've taken opportunities to invest in the Australian Residential Mortgage Backed Securities (RMBS) market. In the period since the onset of the financial crisis these high-quality assets have been significantly undervalued when compared to their historical valuations. As such, they provide the fund with attractive return prospects with low risk.

The CSS Cash Investment Option returned 3.2% after tax, which was in line with its investment objective and reflected the path of market interest rates. Over the course of 2009/10, the RBA increased the official cash rate from 3.0% to 4.5%, which resulted in increased investment returns of the CSS Cash Investment Option.

Investment option performance summary

Investment option	1 year to 30 June 2010	5 years to 30 June 2010	10 years to 30 June 2010
Default Fund	9.3%	3.5%	4.3%
Cash Investment Option	3.2%	4.8%	N/A

All returns are after fees and taxes.

The chart above shows how \$50,000 invested in the CSS has grown in the Default Fund over the past ten years (including tax), compared with how it would have grown if invested in a low-risk asset class like bank bills or cash (including tax).

Remember, super is a long term investment and past performance is no indication of future performance – investment markets are volatile and it is not possible to predict when they will go up or down, or how quickly this will happen.

Changing investment strategies: making the right choice

You can choose how your super is invested. Both the Default Fund and the Cash Investment Option are available to you, and which one you choose should depend upon your personal goals, financial situation and plans for the future.

Before you change...

In this section of the report, you'll find information on the investment objectives and strategies for both CSS investment options. In addition to reviewing this information, there are some other things you should consider before changing your investment strategy

1. What is your investment timeframe? How long do you plan to invest your money before withdrawing it for retirement?
2. What level of investment earnings are you hoping for? If you're looking for a higher return, you will need to be willing to accept a greater degree of volatility.

3. What level of risk are you willing to tolerate? Different investment options carry different levels of risk and you will need to decide what you are comfortable with.

If you have not made a choice, your super will be invested in the Default Fund. The Cash Investment Option is an alternative to this, and provides an opportunity to have less volatile earnings for your taxed accumulation (member and productivity) components, in exchange for the possibly higher, but more volatile, return of the Default Fund.

Before you make an investment choice you should get advice from a licensed financial adviser and read through the **CSS Product Disclosure Statement** which is available at www.css.gov.au.

If you decide that you would like to change your investment strategy, you can download a **Transfer form** from the CSS website at www.css.gov.au or call 1300 000 277 and we will send one to you.

Investment managers

ARIA works with leading investment managers to ensure that your super is well managed.

Our policy on derivatives

Investment managers who enter into an investment management agreement with ARIA may use derivative securities (known as derivatives) to facilitate increases or decreases in the fund's exposure to different investment markets. Derivatives are financial instruments whose value changes in response to the changes in underlying variables. Examples include futures, options and forward exchange contracts.

Derivatives within investment mandates are mainly used to reduce risk for you. Our investment managers are not permitted to use derivative securities for gearing the fund or any part of the fund, or for placing the fund in a position where it is short an asset class.

The investment mandates we grant to our investment managers, allowing them to use derivatives, reflect the policy for the fund as a whole. If ARIA's investment managers are permitted to use derivative securities the limits will be clearly set out in the mandate. ARIA's internal investment team (and Custodian) monitor whether derivatives use is consistent with ARIA's policy and will advise ARIA of any breach.

If you would like more information about our derivatives policy, please call ARIA on 02 6263 6999.

Default Fund

Investment objectives

The Default Fund's key investment objective is to maximise the long-term real return within certain risk constraints. While the future investment climate cannot be predicted, ARIA is constantly monitoring its asset allocation and the global economic environment in which your money is invested.

Currently, a little over half of the fund's assets are invested in equities, the majority of which are traded on listed exchanges. The fund also has a substantial program of alternative investments, including private equity and market-neutral strategies. To a degree, these are expected to behave independently of listed equity and bond markets, reducing the overall risk of the fund through the benefits of diversification.

Other investments include a portfolio of direct and indirect property holdings, actively diversified funds, government and corporate bonds, Australian residential mortgage backed securities (RMBS) and cash.

Default Fund asset allocation

Asset allocation	At 30 June 2009	At 30 June 2010

All performance information is after tax and fees.

ARIA determines an earning rate for the Default Fund every business day, and earnings are allocated to members' accounts monthly. The daily rates are used to calculate entitlements for members exiting the CSS.

For more information about our investment performance, see the **Investments** section of our CSS website at www.css.gov.au.

Default Fund earning rates

Over the five years ending 30 June 2010, the compound average rate of earnings (after tax and fees) for the Default Fund is 3.5% per annum.

Year	Earning rate (after tax and fees)	Inflation rate
2005/06	13.1%	4.0%
2006/07	13.7%	2.1%
2007/08	-1.6%	4.5%
2008/09	-14.3%	1.5%
2009/10	9.3%	3.1%

Cash Investment Option

Investment objectives

The Cash Investment Option's key investment objective is to preserve its capital and earn a return close to that of the UBSA Bank Bill Index.

The Cash Investment Option invests in:

- > cash (deposits with a bank)
- > Australian-dollar-denominated money market securities that are issued or guaranteed by a government, bank or corporate entity with a minimum credit rating of AA (or its floating rate equivalent), as determined by Standard & Poor's (or the equivalent from Moody's or Fitch if no Standard & Poor's rating is available)
- > interest rate futures and options traded on the Sydney Futures Exchange.

2009/10	3.2%	3.1%

Looking to the future

The CSS is a large superannuation fund by Australian standards, and it will likely continue to be for many years yet. However, with fund outflows from departing members now exceeding fund inflows, we increasingly take account of liquidity considerations in framing our investment strategy.

ARIA manages the assets of the CSS, PSS and PSSap in a single investment vehicle. This provides greater economies of scale in managing the closed CSS fund and helps to keep the running costs of the fund at a competitive level.

The year that's been

Financial statements

Commonwealth Superannuation Scheme unaudited financial statements for 2009/10

	\$ million
Value of Fund as at 1 July 2009	4,741.4
Inflows	
Changes in market value of investments	447.6
Other income	1.6
Employee contributions	103.0
Employer contributions	37.4
Government co-contributions	1.9
Appropriation from CRF	3,144.0
Outflows¹	
Benefits paid	(3,703.4)
Income tax expense	(5.8)
Value of the Fund as at 30 June 2010	4,767.7
Assets and liabilities as at 30 June 2010	
Investments ²	4,747.8
Cash at bank	41.1
Amounts to be appropriated from Consolidated Revenue Fund	0.3
Other receivables	0.2
Benefits payable	(16.0)
Other payables	(0.2)
Provision for tax	(5.5)
Net assets as at 30 June 2010	4,767.7

- The expenses of the CSS are met in the ARIA Investments Trust and accordingly no administration or investment expenses appear here.
- The value of investments shown above reconciles with the Total Fund values shown on page 6 as follows:

	\$ million
Default Fund	4,484.7
Cash Investment Option	254.0
Total Fund	4,738.7
Add/(less):	
Valuation difference due to timing	9.1
	4,747.8

The assets of the CSS are invested in the ARIA Investments Trusts (AIT), where they are pooled with the investments of the other Commonwealth public sector superannuation funds – the Public Sector Superannuation Scheme (PSS) and the Public Sector Superannuation Scheme accumulation plan (PSSap) – in order to deliver a cost efficient investment process. The AIT invests in multiple specialist investment funds and portfolios.

The AIT receives income such as dividends, interest, trust distributions and gains and losses on sale and incurs administration and management expenses including expenses that would otherwise be incurred by the CSS.

The operating surplus or deficit generated by the AIT is reflected in daily unit prices provided by the AIT for its unitholders including the CSS, and daily earning rates based on the unit prices are published on the CSS website. If you would like to see a copy of the CSS audited financial statements for this year and the reports from the auditor please refer to our Annual Report to Parliament, (which is published and tabled in the Parliament in October) at www.aria.gov.au, send an email to members@css.gov.au, call us on 1300 000 277 or write to CSS, PO Box 22 Belconnen ACT 2616.

The year that's been (continued)

Chairman's report

It is with pleasure that I present my inaugural CSS Annual Report as ARIA Chairman, having been appointed in December 2009. In this report you will find information on the operations of the CSS for the year ending 30 June 2010.

Investment performance

After the previously challenging year, 2009/10 was generally a strong year for investment markets with the Australian share market rising by around 13.1% and international shares rising almost as much. This contributed to all investment options recording positive returns in 2009/10.

The CSS Default Fund recorded a return of 9.3% and the CSS Cash Investment Option achieved a return 3.2%. The CSS also achieved its target return objective over the seven year period to June 2010. For further information, see **Investments** section on page 5.

The year ahead

We remain committed to delivering competitive investment returns in the long-term and giving our members the information they need to make the right super decisions.

In the coming year we will continue to work to achieve product and service enhancements such as permitting salary sacrifice to the PSSap for CSS and PSS members, having a PSSap allocated pension product and providing intra-fund advice to our members. These are important reforms to ensure our members continue to enjoy the benefits of competitive superannuation offerings.

Trustee Board

I thank my fellow trustees for their contribution in 2009/10. During the year Steven Crane resigned from his position on 27 October 2009 and Dennis Trewin was reappointed until 30 June 2012.

ARIA staff

I would also like to acknowledge and thank ARIA staff for their commitment throughout the year and in anticipation of their continuing commitment and enthusiasm for the coming year. Their ongoing dedication is a key component of ARIA's continued success.

I hope you find this Annual report a useful source of information about CSS's operations and accomplishments and I hope it helps you get the most out of your super.

Who's who: your trustees in 2009/10

Tony Hyams
Chairman (independent)
Appointed 21 December
2009 to 25 November 2012

Peter Feltham
Trustee (ACTU nominated)
Appointed 1 July 2005,
reappointed to 17 July 2012

Margaret Gillespie
Trustee (ACTU nominated)
Appointed 1 October 2007
to 30 September 2010

Winsome Hall
Trustee (ACTU nominated)
Appointed 1 July 1996,
reappointed to 30
September 2010

Dennis Trewin AO
Trustee (employer nominated)
Appointed 20 December
2007, reappointed
to 30 June 2012

Brian Daley
Trustee (employer
nominated)
Appointed 19 March 2009
to 12 March 2012

Steven Crane
Appointed Trustee
1 October 2007
resigned 27 October 2009

Full biographies for each of the trustees can be found at www.aria.gov.au.

For details of the procedure for trustee appointments and terminations, please visit **The ARIA Team** in the **About us** section of the ARIA website.

The trustees manage the CSS and invest in the funds in accordance with the law and relevant regulatory requirements. All trustees are appointed in writing by the Minister for Finance and Deregulation.

ARIA and individual trustees are covered by indemnity insurance to protect themselves and the CSS from losses arising from certain claims against them. To date, there has never been a claim against ARIA or a trustee that has resulted in the loss of members' monies, nor have any regulatory penalties been imposed.

Contact us

For all the information you need to make smart choices about your super, visit www.css.gov.au.

On our website you'll find:

- > our **Product Disclosure Statement**
- > a handy glossary of terms
- > forms and publications to change your investments or learn more about your options
- > news and information
- > dates and locations for ARIA's free At Work for You superannuation seminars

> **Member services online**, where you can:

- use the **CSS i-Estimator** online calculator to estimate your benefit
- update your address and contact details
- sign up to receive your full **Member Statement** online
- view and download your **Member Statement**
- pay surcharge and leave-without-pay contributions via BPAY.

To access the online member services you will need a secure access number. If you have lost or forgotten your access number, you can re-set it through the **Member services online** login page. If you need help to do this, please don't hesitate to contact us.
